## FOR IMMEDIATE RELEASE

---

### **MEDICAL FIRM BEGINS "YOUR PRICE" BIDDING PROGRAM**

*EcCare Health Centers Announce Program That Allows Patients to Bid  
on Medical Service*

As the Federal Government debates and restructures medical services within the United States, the officers of EcCare Health Centers, which are located in Desoto and Irving, Texas, are constantly looking for programs that assist the families within our local communities to obtain affordable, quality health care. Today, EcCare is announcing exactly another such a program. Beginning June 22, 2009, patients can bid on multiple types of medical services and set appointments to be seen during Saturday business hours. Patients using the "Your Price" program may be able to save 30% to 50%, or more. These medical services range from basic diagnostic exams, school physicals to Department of Transportation medical certifications and drug screenings.

The EcCare "Your Price" program provides families or individuals an aggressive way to lower their health care expense while obtaining quality care. The types of service offered within the "Your Price" program are non-urgent in nature and thus, fit perfectly into a program where a Patient can set the price. "Your Price" medical services are offered on Saturdays.

The EcCare mission is to provide our patients the same or better care than a hospital emergency room, at 30% to 50% less cost and have treatment by the Physician in 60 minutes or less. EcCare (originally Emergency Care Center) was created on February 13, 1980 as an alternative to hospital emergency departments. The founder, Gregory P. Ennis, M.D., recognized that most patient visits to the hospital emergency room were not urgent or life threatening. He launched the Emergency Care Center with the objective of providing quality, attentive care to patients needing urgent attention, but who did not need the hospital emergency department.

Interested Patients are requested to view all program services and guidelines at the [www.eccare.com](http://www.eccare.com) website.
